

**Long Range Utility Services Plan**

The Texas Tech University Health Sciences Center meets the Long Range Utility Services Plan, as required by the Texas Administrative Code Title 34, Chapter §19.16. Texas Tech University Health Sciences Center consists of the Main Campus in Lubbock, and Regional Campuses at Amarillo, Odessa, Midland, Abilene, and Dallas. Utility Companies serving these campuses are as follows:

Lubbock:	Electricity	City of Lubbock Utilities (prev. LP&L)
	Gas	Atmos Energy
	Water & Sewer	City of Lubbock Utilities (prev. LP&L)
	District Chilled water	Texas Tech University
	District Steam	Texas Tech University
	RO,CA & E/Power	Texas Tech University
Amarillo:	Electricity	XCEL Energy
	Gas	Atmos Energy
	Water & Sewer	City of Amarillo
Odessa:	Electricity	Reliant Energy
	Gas	Atmos Energy
	Water & Sewer	City of Odessa
Midland:	Electricity	Reliant Energy
	Gas	Atmos Energy
	Water & Sewer	City of Midland
	JW Utilities	Midland Memorial Hosp.
Abilene:	Electricity	Reliant Energy
	Gas	Atmos Energy
	Water & Sewer	City of Abilene
Dallas:	Electricity	Reliant Energy
	Water & Sewer	City of Dallas

All Electric and Gas Utility companies are publicly traded companies with the exception of City of Lubbock Utilities (previously Lubbock Power & Light) and XCEL Energy.

We don't anticipate any utility disruption in any of our buildings except emergency situations such as equipment failures, natural disasters effecting main supply lines etc.

## Utility Service Plan

TTUHSC's institutional goals and strategies for long term procurement of utilities are provided in the table attached. Included are the current contract arrangements for TTUHSC utility procurement for:

- Electricity
- Natural Gas
- Water and Sewer
- Plans for distributed generation, renewable energy and demand response

TTU System intends to initiate an energy procurement program for all institutions, whereby it will award a contract to an Energy Advisor to procure energy through competitive bids for all the TTUS campuses in the State of Texas.

There are no plans at this time for procurement of water and sanitary sewer from suppliers other than the present suppliers. Plans for self-generation and self-distribution of electric power by conventional means (diesel/gas engine driven generators), as well as wind, solar, and fuel cells, are not cost effective. Though our electric providers are implementing renewable energy systems at an aggressive pace.

### Current Contract Arrangements:

TTUHSC has a contract with LP&L to supply electricity to Lubbock facilities at a fixed price (\$0.01215/kWh) in addition to the whole sale price rate that LPL purchases power from Xcel Energy and other providers. In CY 2023, City of Lubbock electricity is expected to be deregulated. We have plan to take bids to select electric provider.

TTUHSC has long term contract with Reliant Energy to provide electricity to the Permian Basin and Abilene areas at fixed rates until 4/30/2026. Reliant Energy has a contract for the Dallas facility until 4/30/2024.

Contracts with the other utility providers are non-existent. Services are provided on an informal basis through contacts with the various local utility suppliers.

On-site generators have been installed to provide power for emergency purposes only. They are not intended to be used for self-generation or load shedding purposes. They are not rated for continuous operation.

**TTUHSC LONG RANGE UTILITY SERVICES - CURRENT PLAN**

<b>ELECTRICITY:</b>	<b>AMARILLO</b>	<b>LUBBOCK</b>	<b>ABILENE</b>	<b>ODESSA</b>	<b>MIDLAND</b>	<b>DALLAS</b>
