HUB Summary by Fund Manager Report

Starting in August, Fund Managers will receive a new report each month: Hub Summary by Fund Manager. This report is cumulative for the fiscal year through the end of the prior month. For example, reports received in August, 2014 will show results from September 1, 2013 through July 31, 2014.

The subheading contains the name of the fund manager, TTUHSC's institutional HUB goal of 25% and the individual Fund Manager's calculated percent through the indicated period.

TTUHSC's policy is to create an environment that will enhance HUB participation in procurements and contracts. In accordance with [34 TAC §20.13](#), TTUHSC makes a good faith effort to utilize HUBs in contracts for construction, services (including professional and consulting services) and commodity purchases. This report will help each fund manager track their HUB spending and, if necessary, make adjustments in their spend with non-HUB vendors to satisfy these policies. More information can be found on Purchasing's [HUB Program](#) webpage.
