Hello from the Printing Center!
We have missed all of you!

*In our time apart, we have been working
hard on something new...*

We have a new printer! A Colex cutter too!
Listen to all of the new cool things it can do!
The Mimaki can print posters, papers or a vinyl!
**message, plastic, acrylic, coroplast—so
many options for usage!**

**Work with the designers to construct something
great. Displays, posters, boxes, and more to create!**
Dream up an idea, but need help? Just Ask!
Our team is always up to the task.

**diploma folder
spot UV finish**

**Print large on the Mimaki with a UV
finish on top. Then the Colex cutter can route
out specialty shapes to make it POP!**

So give us a call, we just can't wait!
What will the Printing Center help you create?

**This fun poem means the Printing
Center has even more production capabilities
now and we are excited to share this news!**
